

A decorative border of white maple leaves is scattered across the top and sides of the dark red background.

New to Pacific Organics! *100% Pure, Naturally Organic* *Canadian Maple Syrup...*

A Natural Nutritional Ingredient...

Are all sweeteners created equal? Not really... Maple Syrup is less refined than honey and sugar and retains many valuable nutrients. In fact Maple Syrup has many health benefits...

- **ESSENTIAL VITAMINS & MINERALS.** On average, a 4 Tbsp serving of Maple Syrup supplies more than 100% of our daily required intake of manganese, 37% of riboflavin, 18% of zinc, 7% of magnesium and 5% of calcium and potassium.

What other sweetener can beat that!

- **OTHER BENEFICIAL COMPOUNDS.** Maple Syrup and its products also contain phenolic compounds which are found in sap. In a recent study on Maple Syrup products, Quebecois researchers demonstrated that these substances have antioxidant and anticancerogenic properties.
- **LOW GLYCEMIC INDEX.** Maple Syrup (GI 54) compares well with other sweetening products such as sugar (GI 58) and honey (GI 87).

Naturally Organic...

There are strict laws governing the harvest and production of Maple Syrup in Quebec. Maple Syrup is a wild harvested product that doesn't come into contact with the herbicides, pesticides and fertilisers used in conventional fruit and vegetable farming. The trees grow in a forest and the only time when the delicious Maple water is available for harvesting is early spring when a blanket of snow still covers the ground. Maple Syrup making starts from a natural phenomenon. During spring time, when nights are still cold (below freezing), the water from the soil is sucked into the tree via a natural absorption phenomena. During the day time, warmer temperatures create pressure in the tree. The pressure pushes the water back to the bottom of the tree which allows one to collect a part of the sap flowing down. This watery sap is then evaporated to produce Maple Syrup.

Revolutionary NEW packaging...

100% pure Canadian Maple Syrup is now available in 12L packs. These packs contain a sturdy plastic storage bucket and three 4L bags of Pure Maple Syrup.

- **NO REFRIGERATION REQUIRED.** This revolution in packaging means you no longer have to store your syrup in the cool room once it's opened, and it remains deliciously fresh down to the last drop. Plus using maple syrup at room temperature ensures greater flavour.

- **LESS WASTE.** Once you have the bucket you can order the refill bags on their own. No more massive drums to dispose of.

375ml squeeze bottles, an extra 50% more syrup!

Quality Canadian Maple Syrup at an affordable price. These bottles will compete with the existing 250ml on the market in price and superior quality of syrup. The bottles are made from a special plastic that is coated to prevent oxygen from damaging the syrup it contains. It's quality is equal to that of glass plus it is 100% recyclable. The specially designed cap allows greater control for pouring syrup - great for kids as it's unbreakable and easy to clean!

Why our Maple Syrup is better than the rest...

Not only do we lead the way in packaging, our Maple Syrup comes from specially selected boutique farms in Quebec. These farmers have developed a top quality control system to classify their syrup, preserve its unique flavours and keep the high standard that Quebec is famous for. Quebec produces 80% of the World's Maple Syrup. The choice of Maple Syrup connoisseurs throughout Canada, preferred by top Canadian restaurateurs, our maple syrup's flavour has their seal of approval, giving it a world reputation as one of the best!
